Maryland Addendum

Voting Leave

Employees who are eligible and registered to vote in an election and who do not have two (2) consecutive hours before or after work to vote may request up to two (2) hours with pay to vote.

Upon their return to work employees must provide proof of voting on a form prescribed by the State Board.

Personal and Company-Provided Portable Communication Devices

Semantic Arts-provided portable communication devices (PCDs), including cell phones and personal digital assistants, should be used primarily for business purposes. Employees have no reasonable expectation of privacy in regard to the use of such devices, and all use is subject to monitoring, to the maximum extent permitted by applicable law. This includes, as permitted, the right to monitor personal communications as necessary.

Some employees may be authorized to use their own PCD for business purposes. These employees should work with the IT department to configure their PCD for business use. Communications sent via a personal PCD also may be subject to monitoring if sent through the Company's networks and the PCD must be provided for inspection and review upon request.

All conversations, text messages and e-mails must be professional. When sending a text message or using a PCD for business purposes, whether it is a Company-provided or personal device, employees must comply with applicable Company guidelines, including policies on sexual harassment, discrimination, conduct, confidentiality, equipment use and operation of vehicles. Using a Company-issued PCD to send or receive personal text messages is prohibited at all times and personal use during working hours should be limited to emergency situations.

If employees who use a personal PCD for business resign or are discharged, they will be required to submit the device to the IT department for resetting on or before their last day of work. At that time, the IT department will reset and remove all information from the device, including but not limited to, Company information and personal data (such as contacts, e-mails and photographs). The IT department will make efforts to provide employees with the personal data in another form (e.g., on a disk) to the extent practicable; however, the employee may lose some or all personal data saved on the device.

Employees may not use their personal PCD for business unless they agree to submit the device to the IT department on or before their last day of work for resetting and removal of Company information. This is the only way currently possible to ensure that all Company information is removed from the device at the time of termination. The removal of Company information is crucial to ensure compliance with the Company's confidentiality and proprietary information policies and objectives.

Please note that whether employees use their personal PCD or a Company-issued device, the Company's electronic communications policies, including but not limited to, proper use of communications and computer systems, remain in effect.

Portable Communication Device Use While Driving

Employees who drive on Company business must abide by Maryland law, which prohibits PCD (cell phone or personal digital assistant) use while driving. "Use" includes, but is not limited to, talking or listening to another person or sending an electronic or text message via the PCD.

Employees should proceed to a safe location off the road and safely stop the vehicle before placing or accepting a call.

Under no circumstances should employees feel that they need to place themselves at risk to fulfill business needs.

Since this policy does not require any employee to use a cell phone while driving, employees who are charged with traffic violations resulting from the use of their PCDs while driving will be solely responsible for all liabilities that result from such actions.
